(a) Primary pipeline (about 80 s per patient)
Cells of one patient (up to 500)
Macenko (if shift)
Fine-tuned EfficientNet-B0
93 engineered features (original images)
Mean cell probability
Pooled LR
Attention MIL
Mean of percentile scores
Development threshold
Prioritize for review
(b) Secondary pipeline (about 61 s per patient)
Cells of one patient
Macenko (if shift)
Frozen EfficientNet-B0
PCA-64 (20x smaller)
Pooled LR (321 parameters)
Development threshold
Prioritize for review
